

AENOR

International expert for the implementation and maintenance of an EMS (EMAS or equivalent).

Under the Framework Contract “Consultancy in environmental management systems, reduction and offsetting of greenhouse gas emissions” AENOR is expanding its network of experts and partners’ companies with knowledge in EMAS Regulation, and experience in implementation, maintenance and registering of EMAS Environmental Management Systems (EMS) or other equivalent systems (such as ISO 1400).

The services will be provided to 17 European offices and agencies located in European countries.

The specific requirements for Senior consultant are:

- Bachelor’s degree in Engineering or Master’s degree in Agricultural, Biological or Environmental Sciences or equivalent
- A minimum of 7 years’ professional experience in implementing or maintaining environmental management systems (based on the EMAS Regulation and ISO 14001)
- High degree of initiative, organisation, autonomy and flexibility.
- Knowledge of English must be at least C1 according to the Common European Framework of Reference Languages
- Experience in training on topics related to the EMAS Regulation and EMS will be valuable.
-

For Junior consultant:

- Bachelor’s degree in Engineering or Master’s degree in Agricultural, Biological or Environmental Sciences or equivalent
- A minimum of 3 years’ professional experience in implementing or maintaining environmental management systems (based on the EMAS Regulation and ISO 14001)
- High degree of initiative, organisation, autonomy and flexibility.
- Knowledge of English must be at least C1 according to the Common European Framework of Reference Languages
- Experience in training on topics related to the EMAS Regulation and EMS will be valuable.
