

Press Release

Exide Technologies obtains ISO 27001 certification from AENOR in information security management

- This certification recognizes excellence in the implementation of an information security management system.

Madrid, February ,13th 2025. - Exide Technologies, a leading provider of battery storage solutions for industrial and automotive applications, has received ISO 27001 certification from AENOR, a leading trust-generating entity, for information security management and data protection. This international standard, established by the International Organization for Standardization (ISO), recognizes organizations that implement effective information security management systems and comply with the highest standards of data protection and resilience against potential threats.

The certification of AENOR's Information Security Management System contributes to promoting the protection activities of its systems and information in organizations, improving their image and generating trust with third parties. Achieving ISO 27001 is a fundamental step for Exide Technologies' strategy, as it will strengthen its ability to protect data and operate securely.

The ISO 27001 certification at Exide Technologies covers IT and networking services for all business units, IT systems for producing and shipping batteries, and internal services like Sales, Marketing, Finance, HR, IT service management, and Unified Communication and Collaboration (UCC) services. The achievement of the certification is preceded by a rigorous evaluation of its processes and security systems and the implementation of a continuous improvement system, based on risk analysis, metrics, and indicators.

With 135 years of experience, Exide has developed and globally marketed innovative batteries and systems, contributing to the energy transition and driving a cleaner future. Exide's wide range of lead-acid and lithium-ion solutions serves various applications, including 12V batteries for combustion and electric vehicles, traction batteries for material handling and robotics, stationary batteries for uninterruptible power systems, telecommunications, front and behind-the-meter energy storage, and propulsion batteries for submarines, among others. Exide Technologies' culture and strategy revolve around recycling, sustainability, and environmental responsibility, reflecting its commitment to being a responsible corporate citizen.

About AENOR

AENOR contributes to the transformation of society by building trust between organizations and individuals through conformity assessment services (certification, inspection, and testing), training, information, and business transformation consulting. It is the leading trust-generating entity in Spain, with more than 88,000 workplaces worldwide holding one of AENOR's certifications in fields such as Quality Management, Sustainability, Non-Financial Information Verification, Animal Welfare, Occupational Health and Safety, Digitalization, and Compliance.

AENOR's key competitive advantages include the highest brand recognition among businesses (B2B) and consumers (B2C); having its own personnel, allowing it to manage accumulated knowledge for the benefit of its clients; innovating in solving new competitiveness gaps thanks to its close proximity to knowledge sources; and its extensive geographical and sectoral reach.

AENOR is a global entity, currently operating in 87 countries. In Spain, it has 19 offices across all Autonomous Communities, with its own auditors and a permanent presence in 12 other countries, mainly in Latin America and Europe.
